

Solutions for Africa s.p.r.l **Quality Policy Statement**

Solutions for Africa s.p.r.l (S4A) is an experienced exploration and water well drilling contracting company committed to satisfying the expectations of our Clients in providing a high quality standard of work and service that meets as a minimum the contracted quality control requirements.

Commit to ensure that upon engagement on a project we will develop in conjunction with the Client a project specific quality control plan. This plan will incorporate the Client's particular requirements taking into consideration the limitations and demands of the mining environment.

This quality control plan will consider the accuracy and speed of execution of each activity and of the efficiency and productivity required to ensure that the project timelines and quality standards required are feasible and in fact are achieved. Central to such a quality control plan is the contract specifications, execution schedules and progress reports along with regular inspections to identify any deviations in a timely fashion.

Should any irregularities be identified they will be promptly brought to the attention of the Client and the Site geologist so that appropriate agreed corrective action can be applied.

It is also expected that the Client will bring to our attention promptly any identified or perceived irregularities and be fairly dealt with on any rectification requirements.

S4A is committed to a process of self-improvement and the maintenance of a workable quality control system that can be monitored and audited.
